TUGAS UTS MK SISKOMBER KELAS 3A TTE

KETENTUAN:

- **BUAT RESUME MATERI DALAM FORMAT PRESENTASI FILE PPT (MINIMAL 10 SLIDE) DENGAN NARASI YANG LENGKAP, BERURUTAN DAN UTUH**
- **NOMOR URUT LINK SESUAI DENGAN NO PRESENSI SISWA**
- **DIKUMPULKN PADA SAAT JADWAL UTS DAN TTD DI LEMBAR ABSEN**
- **BAHAN DIAMBIL DARI LINK INTERNET SBB:**

1. 5G New Radio (NR), 5G NR Base Station Types, 5G NR Base Stations Classes
2. 5G NR Transmitter Signal Quality Frequency Error, 5G NR Transmitter Signal Quality Time Alignment Error
3. 5G Technology Requirements , 5G – What Makes It Different & How Does It Impact Your Business, 5G and 4G Comparison
4. 5G NR (New Radio) Frequency Bands, 5G Absolute Radio Frequency Channel Number (NR-ARFCN)
5. 5G Cell Phone Architecture, 5G mmWave Spectrum, 5G Frequency Bands
6. 5G NR Deployment & Spectrum Scenarios, Structure of the 3GPP NR (5G) Specification
7. 5G Network Abbreviations and Terminologies, 5G/NR Channel Codes Evolution Consideration and 3GPP Recommendation on Polar Codes

5G Candidate Waveforms

8. 5G NR Multiplex Access Techniques , 5G NR Physical Layer Vulnerability- Jamming, Sniffing and Spoofing
9. 5G NR Bandwidth Part(BWP) , 5G NR BWP Types and BWP Operations
10. 5G NR Grant Free Dynamic Scheduling, 5G NR sounding Reference Signal (SRS), 5G NR RACH Preamble Types: Long and Short Preambles
11. NR-Logical Channels,Transport Channels and Physical Channels Mapping
12. 5G New Radio Throughput Capabilities, 5G New Radio Spectral Efficiency, 5G NR Control Plane Latency, 5G NR User Plane Latency
13. 5G Key Performance Indicator Definitions Template by 3GPP, 5G End to End KPI – Accessibility, Integrity and Utilization

14. 5G NR gNB Logical Architecture and Its Functional Splits, 5G NR gNB High Layer Split, 5G NR Interfaces X2/Xn, S1/NG, F1 and E1 Functions
15. 5G Channel Modes: Requirements and Deployment Scenarios, 5G Self Backhaul- Integrated Access and Backhaul, 5G NG Identities (UE and Network Identifiers)
16. 5G NR Radio Protocol Stack (Layer 2 and Layer 3), 5G NR User Plane Protocol
17. 5G NR QoS Parameters, 5G NR QoS characteristics, 5G UE Categories – 3GPP Release -15 UE Cat. Types
18. Control and User Plane Separation for Next Generation EPC, 3GPP Evolution for MIMO

5G Network Architecture

19. 5G Reference Network Architecture, 5G Cells Types, Cell groups and Cell nodes
20. 5G Network Sharing: Concept, Benefits and Architectures, Hybrid Core Network – 4G Core to 5 G Core Interconnection, Deployments Scenarios for 5G-NR

Layer 1: Physical Layer – PHY

21. 5G NR Antenna Ports, 5G NR Antenna Port – Logical and Physical Antenna Mapping
22. 5G NR Physical Layer Timing Unit, 5G Subcarrier Spacing, Frame and Subframe, Slot and OFDM Symbol, Motivation Behind Having Multiple Numerology in 5G NR
23. 5G NR Resource Block Definition and RB calculations, 5G NR Modulation and Coding Scheme (MCS), NR-Cell Physical Layer Cell ID
24. NR-Primary Synchronization Signal (PSS), NR-Secondary Synchronization Signal (SSS), 5G NR SSB Positioning – Time and Frequency Resources
25. 5G NR pdcch-ConfigSIB1, 5G NR ControlResourceSetZero & SearchSpaceZero
