The importance of guessing meanings from context

Context is helpful in reading to:
1. find definitions from structural clues
2. guess meanings from word parts
3. guess meaning of difficult words
4. guess meaning of simple words

1. Find definitions from structural clues

1A. Definitions from structural clues

When you have to determine the meaning of a word in a passage, it is possible (1) that the passage provides information about the meaning of the word and (2) that there are structural clues to tell you that the definition of a word is included in the passage.

Example

The passage:

One of the leading schools of psychological thought in the twentieth century was behaviorism—the belief that the role of the psychologist is to study behavior, which is observable, rather than
Line conscious or unconscious thought, which is not. Probably the best-
(5) known proponent of behaviorism is B.F. Skinner, who was famous for his research on how rewards and punishments influence behavior. He came to believe that positive reinforcements such as praise, food, or money were more effective in promoting good behavior than negative reinforcement, or punishment.

The questions:

1. In "behaviorism" in line 2, a psychologist is concerned with

   (A) conscious thought patterns
   (B) unconscious thought patterns
   (C) observable actions
   (D) unobservable actions

2. What is "positive reinforcement" in line 7?

   (A) A gift
   (B) A reward
   (C) A bribe
   (D) A penalty

3. What is "negative reinforcement" in line 9?

   (A) A promotion
   (B) A reward
   (C) A surprise
   (D) A punishment

To answer the first question, you should look at the part of the passage following the word *behaviorism.* The dash punctuation (—) indicates that a definition or further information about behaviorism is going to follow. In the information following the dash you should see that the behaviorist is interested in *behavior, which is observable,* so the best answer to this question is answer (C). To answer the second question, you should look at the part of the passage following the expression *positive reinforcements.* The expression *such as* indicates that examples of *positive reinforcement* are going to follow. Your job is to look at the examples of positive reinforcement and draw a conclusion about what positive reinforcement might be. Since *praise, food,* or *money* might be given in return for a job well done, then *positive reinforcement* must be a *reward.* The best answer to this question is therefore answer (B). To answer the third question, you should look at the part of the passage following the expression *negative reinforcement.* The word *or* following *negative reinforcement* tells you that the idea is going to be restated in different words. You can see in the passage that another word for *negative reinforcement* is *punishment,* so answer (D) is the best answer to this question.

1B. Strategies of guessing word meaning from context

The following table shows the strategies that you should remember about vocabulary questions containing difficult words.

STRUCTURAL CLUES	
HOW TO IDENTIFY THE QUESTION	"What is …?" "What is the meaning of ….?" "What is true about …?"
TYPES OF CLUES	Punctuation: comma, parentheses, dashes Restatement: or, that is, in other words, i.e.

	Examples: such as, for example, e.g.
WHERE TO FIND THE ANSWER	Information to help you determine what something means will generally be found after the punctuation clue, the restatement clue, or the example clues.
HOW TO ANSWER THE QUESTION	1. Find the word in the passage 2. Locate any structural clues. 3. Read the part of the passage after the structural clue carefully. 4. Eliminate any definitely wrong answers and choose the best answer from the remaining choices.

PRACTICE 1: Use context to guess meanings from structural clues

PASSAGE ONE (Questions 1–4)

The teddy bear is a child's toy a nice, soft stuffed animal suitable for cuddling. It is, however, a toy with an interesting history behind it.

Theodore Roosevelt, or Teddy as he was commonly called, was president of the United States
Line from 1901 to 1909. He was an unusually active man with varied pastimes, one of which was hunting.
(5) One day the president was invited to take part in a bear hunt; and inasmuch as Teddy was president, his hosts wanted to ensure that he caught a bear. A bear was captured, clunked over the head to knock it out, and tied to a tree; however, Teddy, who really wanted to actually hunt, refused to shoot the bear and in fact demanded that the bear be extricated from the ropes; that is, he demanded that the bear be set free.

(10) The incident attracted a lot of attention among journalists. First a cartoon—drawn by Clifford K. Berryman to make fun of this situation—appeared in the *Washington Post*, and the cartoon was widely distributed and reprinted throughout the country. Then toy manufacturers began producing a toy bear which they called a "teddy bear." The teddy bear became the most widely recognized symbol of Roosevelt's presidency.

PASSAGE TWO (Questions 5–8)

A supernova occurs when all of the hydrogen in the core of a huge star is transformed to iron and explodes. All stars die after their nuclear fuel has been exhausted. Stars with little mass die gradually, but those with relatively large mass die in a sudden explosion, a supernova. The sudden
Line flash of light can then be followed by several weeks of extremely bright light, perhaps as much light as
(5) twenty million stars.

Supernovae are not very common; they occur about once every hundred years in any galaxy, and in 1987 a supernova that could be seen by the naked eye occurred in the Magellan Cloud, a galaxy close to the Milky Way. Scientists periodically detect supernovae in other galaxies; however, no supernovae have occurred in the Milky Way (the galaxy that includes the Earth) since 1604. One very
(10) impressive supernova occurred in the Milky Way on July 4, 1054. There was a great explosion followed by three months of lighted skies, and historical chronicles of the time were full of accounts and unusual explanations for the misunderstood phenomenon—many people believed that it meant that the world was coming to an end.

5. A "supernova" in line 1 is which of the following?

(A) The iron component of a star
(B) The core of a star
(C) The hydrogen in a star
(D) The explosion of a star

(C) Common belief
(D) Unusual occurrence

2. Guess meanings from word parts

2A. Meanings from word parts – kata bagian

When you have to determine the meaning of a long word that you do not know, it is sometimes possible to determine the meaning of the word by studying the word parts.

Example

The passage:

Ring Lardner himself was born into a wealthy, educated, and cultured family. For the bulk of his career, he worked as a reporter for newspapers in South Bend, Boston, St. Louis, and Chicago. However, it is for his short stories of lower middle-class Americans that Ring Lardner is perhaps best known. In these stories, Lardner vividly creates the language and the ambiance of this lower class, often using the misspelled words, grammatical errors, and incorrect diction that typified the language of the lower middle class.

Line (5)

The questions:

1. The word "vividly" in line 6 is closest in meaning to
   (A) in a cultured way
   (B) in a correct way
   (C) in a lifelike way
   (D) in a brief way
2. The word "misspelled" in line 7 is closest in meaning to
   (A) highly improper

   (D) slang
3. The word "diction" in line 8 is closest in meaning to
   (A) writing
   (B) sentence structure
   (C) form
   (D) speech

In the first question, the word vividly contains the word part *viv*, which means life, so the best answer is answer (C). In the second question, the word misspelled contains the word part *mis,* which means error or incorrect, so the best answer is answer (C). In the third question, the word diction contains the word part *dic*, which means speak, so the best answer is answer (D).

2B. Strategies to guess meanings from word parts

Study the following table that shows a short list of word parts to help you guess meanings.

A SHORT LIST OF WORD PARTS

PRACTICE 2: Guess meanings from word parts

PASSAGE ONE (Questions 1–5)

Juan Rodriguez Cabrillo was a Portuguese-born explorer who is credited with the exploration of the coast of what is today the state of California. Sketchy military records from the period show that early in his career he served with the Spanish army from 1520 to 1524 in Spain's quest for subjugation of the people in what are today Cuba, Mexico, and Guatemala. Little is known of his activities over the next decades, but apparently he succeeded in rising up through the ranks of the military; in 1541, he was ordered by Antonio de Mendoza, the Spanish ruler of Mexico, to explore the western coast of North America. Cabrillo set out in June of 1542 in command of two ships, the *San Salvador* and the *Victoria*; he reached San Diego Bay on September 28, 1542, and claimed the terrain for Spain. The peninsula where he landed is today named Cabrillo Point in his honor; the area has been established as a national monument and park, and local residents each year hold a celebration and reenactment of Cabrillo's landing.

From San Diego, Cabrillo continued northward for further exploration of the spectacular California coastline. By November 1542, he had reached as far north as San Francisco Bay, although he missed the entrance of the bay due to a huge storm. Soon after, with the approach of winter, he veered south and headed back to Mexico. He made it as far south as the Channel Islands off the coast of what is today Santa Barbara. Cabrillo, who died on San Miguel Island in the Channel Islands, never made it back to Mexico.

PASSAGE TWO (Questions 6–10)

Checks and balances are an important concept in the formation of the U.S. system of government as presented in the Constitution of the United States. Under this conception of government, each branch of government has built-in checks and limitations placed on it by one or more different branches of government in order to ensure that any one branch is not able to usurp total dominance over the government. Under the Constitution, the United States has a tripartite government, with power divided equally among the branches: the presidency, the legislature, and the judiciary. Each branch is given some authority over the other two branches to balance the power among the three branches. An example of these checks and balances is seen in the steps needed to pass a law. Congress can pass a law with a simple majority, but the president can veto such a law. Congress can then counteract the veto with a two-thirds majority. However, even if Congress passes a law with a simple majority or overrides a presidential veto, the Supreme Court can still declare the law unconstitutional if it finds that the law is contradictory to the guidelines presented in the Constitution.

When you find a word that you are not expected to know, the passage will give you a clear indication of what the word means.

The question:

A "barge" is probably which of the following?

(A) A train
(B) A plane
(C) A bicycle
(D) A boat

In this type of question, you are not expected to know the meaning of the word *barge.* Instead, you should understand from the context that if the *barge* went across a *lake,* then it is probably a type of boat. Answer (D) is therefore the best answer.

3B. Strategies of guessing word meaning from context

The following table shows the strategies that you should remember about vocabulary questions containing difficult words.

PASSAGE ONE (Questions 1–4)

The black widow is the most dangerous spider living in the United States. It is most common in the southern parts of the country, but it can be found throughout the country. The black widow got its name because the female has been known to kill the male after mating and, as a result, becomes a
Line widow.
(5) The black widow is rather distinctive in appearance; it has a shiny globular body, the size and shape of a pea, and is marked on its underbelly with a red or yellow spot. The female is considerably more ample than the male, roughly four times larger on the average.

If a human is bitten by a black widow, the spider's poison can cause severe illness and pain. Black widow bites have occasionally resulted in death, but it is certainly not the norm for black
(10) widow bites to be mortal.

1. In line 2, the word "widow" means
   (A) a type of poison

PASSAGE TWO (Questions 5–8)

Tornadoes occur throughout the world, but for reasons that scientists are not fully able to discern, the great majority occur in the United States. Approximately 700 tornadoes a year occur within the United States, and this comprises three-quarters of the worldwide total. Most of the U.S. tornadoes take place in the Midwest and in the southern states that border the Gulf of Mexico.

In general a tornado cuts a path of a few hundred yards and lasts less than an hour; an average tornado might propel itself at a speed of 15 or 20 miles per hour and therefore cover a distance of 20 or so miles. Tornadoes, however, can be much worse than average. The most devastating tornado on record occurred on March 18, 1925, in the states of Missouri, Illinois, and Indiana. The path of this tornado was more than 200 miles long and a mile wide. Traveling at an average speed of 60 miles per hour, the winds at the center of the storm swirled around at considerably more than 200 miles per hour. A total of 689 people died, and countless more were injured at the hands of this killer storm.

4. Guess meanings of simple words

4A. Meanings of simple words

A simple word is a word that you see often in everyday English. When you find this simple word in a passage, you should *not* give the normal, everyday meaning of the word; instead, you have to give the meaning of the word in this situation.

Example

A line from the passage:

. . . He put his answer this way. . . .

The question:

The word "put" is closest in meaning to which of the following?

(A) placed
(B) set · mengatur
(C) expressed .
(D) handed menyerahkan

In this type of question, you should understand that *put* is a normal, everyday word, and you are not being asked to give the regular meaning of a normal, everyday word, because the primary meaning of to put is to place, answer (A) is *not* the correct answer. To answer this type of question, you must see which of the answer best fits into the sentence in the passage. You cannot

place an answer or *set an answer* or *hand an answer,* but you can *express an answer,* so answer (C) is the best answer to this question.

4B. Strategies of guessing word meaning of simple words

The following table shows the strategies that you should remember about vocabulary questions containing simple words.

VOCABULARY QUESTIONS CONTAINING SIMPLE WORDS	
HOW TO IDENTIFY THE QUESTION	"What is the meaning …?" "Which of the following is closest in meaning to …?" The word is a difficult word, one that you see often in everyday English.
WHERE TO FIND THE ANSWER	The question usually tells you in which line of the passage the word can be found.
HOW TO ANSWER THE QUESTION	Find the word in the passage Read the sentence that contains the word carefully. Look for context clues to help understand the meaning. Choose the answer that the context indicates.

PRACTICE 4: Use context to determine meanings of simple words

PASSAGE ONE (Questions 1–3)

The *piece of eight* was the nickname of the Spanish *peso*, which was the rough equivalent of the American dollar in early America; the peso was accepted coin in much of the Americas, particularly during the period when the stores of Spanish ships were regularly stripped by pirates on the waters off the Americas and "redistributed" throughout coastal towns. The nickname *piece of eight* derived from the fact that the peso was equal to eight *reals* and therefore had the numeral 8 stamped on it. The piece of eight was sometimes actually cut into pieces, or bits, and one popular size was one-quarter of a piece of eight, or two bits. As a consequence, the U.S. quarter of a dollar is sometimes referred to today as two-bits, particularly in the western part of the country. A visitor to that area, if told "It'll be two-bits," should take it that the price of an item is being given.

Smith, who was himself a Scot, lived during the period of the revolutions in America and in France. During this epoch, the predominant political thought was a strong belief in freedom and independence in government. Smith's economic ideas of free trade and competition are right in line *(10)* with these political ideas.

PASSAGE TWO (Questions 6–13)

The life span of an elephant that dies from natural causes is about sixty-five years. Of course, an elephant can perish from a number of "unnatural causes"; e.g., it can be killed by hunters, most probably for the valuable ivory in its tusks; it can die from diseases that spread throughout an elephant herd; or it can die from drought or from the lack of food that almost certainly accompanies the inadequate supply of water.

If, however, an elephant survives these disasters, it falls prey to old age in its mid-sixties. Around this age, the cause of death is attributed to the loss of the final set of molars. When this last set of teeth is gone, the elephant dies from malnutrition because it is unable to obtain adequate nourishment. In old age, elephants tend to search out a final home where there is shade for comfort from the sun and soft vegetation for cushioning; the bones of many old elephants have been found in such places.

PASSAGE THREE (Questions 14–21)

The American flag is the end product of a long evolution. Each of its component parts has its own history.

The very first American flag was hoisted in the skies over Boston on January 1, 1776, by the
Line American forces there. This first flag consisted of thirteen red and white stripes representing the
(5) number of American colonies. It also included the British Cross of St. George and Cross of St. Andrew. It could be considered rather ironic that these symbols of British rule were included on the American flag in that the American colonists were fighting for independence from the British.

The origin of the stars on the current flag is obscure; that is, the stars could possibly have been taken from the flag of Rhode Island, or they could have been taken from the coat of arms of the
(10) Washington family. According to legend, this first flag with stars was sewn by Betsy Ross, a Philadelphia seamstress who was famous for her clever needlework. This version of the flag contained thirteen stars and thirteen stripes, one for each of the thirteen colonies battling for independence.

The original idea was to add one star and one stripe for each state that joined the new, young country. However, by 1818, the number of states had grown to twenty, and it did not work well to keep
(15) adding stripes to the flag. As a result, Congress made the decision to revert to the original thirteen stripes representing the thirteen original colonies and adding a star each time a new state was admitted. This has been the policy ever since.
