## Consequences of an Aging Population

The average age of the population of many countries is getting older. That means that businesses in those countries must adjust to older customers. In fact, many companies are working to respond to the special needs of the elderly. One example of this is the medical industry. New medicines and technologies are being developed especially for the health problems of older people. Another business that offers services for the elderly is the tourist industry. Many travel agents offer special trips for groups of older people. And, finally, there are many different kinds of products made for the elderly. These include everything from shoes and shampoos to magazines and furniture.

## The Importance of Breakfast

Why is breakfast important? “Breakfast like a King, Lunch like a Prince and Dine like a Pauper” It’s a well known phrase, but do you follow it?

Breakfast provides many benefits to our health and wellbeing. Breakfast provides the body and brain with fuel after an overnight fast – that’s where its name originates, breaking the fast! Without breakfast you are effectively running on empty, like trying to start the car with no petrol!

Breakfast support cognitive function. Breakfast also restores glucose levels, an essential carbohydrate that is needed for the brain to function. Breakfast provides energy, studies have shown how eating breakfast can improve memory and concentration levels and it can also make us happier as it can improve mood and lower stress levels.

Breakfast provides energy needs. People’s energy needs vary depending on activity levels and life stage but typically men require more energy than women. Growing children require a lot of energy, as an example boys aged 7-10 years should consume approximately 1970 kcals per day, and girls aged 7-10 years should consume approximately 1740 kcals.
